THE TOASTED TOBACCO

Toasting Process

Preparation & Conditioning

Tobacco is conditioned to the ideal moisture and temperature for even toasting.

Casing Infusion

Flavor casings (cocoa, nutty, fruity) are applied precisely through a controlled spray.

Precision Toasting

Tobacco passes multi-zone chambers, optimizing temp. and airflow to reduce ammonia, enhance flavor

Top Flavoring

Flavoring agents are applied after toasting to enhance the aromatic profile and provide a signature taste.

Advantages of Toasted Tobacco

Richer, rounder taste
with controlled Nicotine

Lower ammonia and
smoother smoke delivery

Enhanced flavor
retention over time

Improved combustibility
and blend compatibility

Grade	Product Type	Description	Nicotine Level	Key Flavor Notes	Remarks
CBT-M	Toasted Burley – Cocoa Casing	High-nicotine Burley base with rich cocoa casing and nutty undertones	3.3%-3.5%	Cocoa, Nutty, Rich	Premium base for full-flavor blends
CBT-1	Toasted Burley – Cocoa Casing	High-nicotine Burley base with rich cocoa casing and nutty undertones	2.9%-3.1%	Cocoa, Nutty, Rich	Premium base for full-flavor blends
CBT-2	Toasted Burley – Cocoa Casing	Similar cocoa and nutty casing on a milder Burley base	2.4%-2.6%	Cocoa, Nutty, Smooth	Ideal for light-to-medium products
CBT-3	Light Toasted Burley	Gentle toasting with cocoa casing; ammonia reduction through high-temperature on filler type Burley.	1.6%-1.8%	Cocoa, Nutty, Smooth	Base for smooth and light styles
SBT-M	Toasted Burley – Sweet Casing	High-nicotine Burley base with natural sugar-based casing for ammonia reduction	3.3%-3.5%	Sweet, Rich	Premium base for full-flavor blends
SBT-1	Toasted Burley – Sweet Casing	High-nicotine Burley base with natural sugar-based casing for ammonia reduction	2.9%-3.1%	Sweet, Rich	Premium base for full-flavor blends
SBT-2	Toasted Burley – Sweet Casing	Natural sugar-based casing on a milder Burley base for ammonia reduction	2.4%-2.6%	Sweet, Mild	Ideal for light-to-medium products
SBT-3	Light Toasted Burley	Gentle toasting with sugar casing; ammonia reduction through high-temperature on filler type Burley.	1.6%-1.8%	Sweet, Mild	Base for smooth and light styles
DVT	Toasted Dark Virginia	Toasted Dark Virginia with chocolate casing and bright aroma	1.3%-1.5%	Chocolate	Ideal for premium blend enhancement
DVT (B)	Toasted Dark Virginia + Burley	Toasted Dark Virginia blended with filler Burley with chocolate casing and bright aroma	1.3%-1.5%	Chocolate	Blended with Burley for flavour enhancement

THE DIET TOBACCO

The DIET Process

Lamina Conditioning:

In-feed lamina moisture is carefully conditioned between 12-12.5% , bringing it up to optimal levels of 20-21%

Cutting:

With a cutting width of 1.0 mm , we ensure filling value of the expanded lamina stays between 8.5-9 cm³/gm

Packing & Final Quality Assurance:

Final product is packed in C- 48 cartons with poly liners , each holding 60 kgs for easy handling and shipment.

Advanced DIET Processing:

Our process reduces tar and we ensure filling value of the expanded lamina stays 8-9 cm³/gm (As per requirement)

Why Choose DIET Tobacco?

Our Product Range

Grade	Quality	Tobacco Type	Filling Value	Nicotine	Sugar
FCEX-1	Grade-1	100% FCV NC - 95	8-9 Cm ³ /gm	1.65%	12.0%
FC8B2EX-1	Grade-1	80% FCV, 20% Burley	8-9 Cm ³ /gm	1.95%	10.0%
BEX-1	Grade-1	100% Burley	8-9 Cm ³ /gm	3.00%	<2%
